INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application
PCT/US03/25707

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims <u>1-25</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-25</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-25</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-25 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an assembly having an external sleeve with a first and second box, a second tubular, and an internal sleeve as called for in claim 1. Further, the cited references fail to teach an assembly comprising a first tubular with a pin, a second tubular with internal threads coupled to the external threads of the pin, and an external sleeve coupled to and overlapping with the tubular ends. Upon further consideration, the Peterson failed to teach the external sleeve coupled to and overlapping the ends of the tubulars as called for in the claimed combination.

Claims 1-25 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
